

WHAT YOU CAN EXPECT

After how many sessions before I begin to see results?

You should notice results after 3-5 sessions, however results may vary depending on the individual

Are there any side effects?

If you are healthy, Non-Surgical Liposuction has no reported side effects, nevertheless in some people it may produce a reddening of the skin that can last for about 2 hours.

Does Non-Surgical Liposuction reduce weight and volume?
It eliminates clusters of fat, which have weight, consequently your body loses volume.

Which body areas can be treated?

Most popular areas are stomach, bums, arms, waist and thighs

Is it painful?

The treatment will never cause pain

Do you have to be a Gymophobics member to receive treatment?

No, our Beauty Suite is open to the general public

Which exercise activity can supplement Non-Surgical Lipo?

The vibration plate is the ideal component due to its toning and draining qualities. You will receive these FREE with every treatment

Is it effective on 'Orange Peel' syndrome?

Yes it is effective because it destroys adipose cells that cause fat storage

Non-Surgical Liposuction has arrived at Gymophobics Cannock!

Our non invasive ultra sound treatment breaks down body fat cells and enables the reduction and removal of cellulite.
Remove those stubborn lumps and bumps as fatty tissue breaks down into a liquid substance that can then pass through your urine.
