

ecoTEC plus 400 series

High efficiency open vent boiler

ecoTEC plus 418 awarded Which? Best Buy in 2015

The ecoTEC plus 400 series offers quality, reliability and efficiency - the very best in home heating.

The ecoTEC plus range offers one of the best open vent solutions available today. Where homes utilise a traditional open-vented system to provide their heating and hot water, the ecoTEC plus open vent boiler is the ideal way to deliver exceptional, energy efficient performance.

The ecoTEC plus open vent boiler is the most compact ever developed by Vaillant. This kitchen-friendly design, along with excellent siting versatility and low lift weight, ensure a quick and straightforward installation.

Open vent boilers, also known as heating only boilers, provide central heating and hot water via a boiler, a storage cylinder housed in the airing cupboard and water tank in the loft. They are the ideal solution for all house types - from a typical one bedroom/bathroom house through to a four bedroom property with three bathrooms.

### Features and benefits

- Available in 12, 15, 18, 24, 30 and 38kW models
