

ecoTEC pro series

High efficiency combination boiler

Product information

ecoTEC pro 28 awarded Which? Best Buy in 2015

The **ecoTEC pro series** offers quality, reliability and efficiency - the very best in home heating.

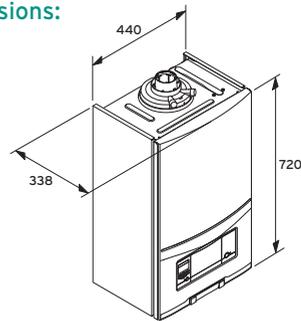

The ecoTEC pro range of combination boilers combines the built in quality, reliability and performance you would expect from Vaillant, with a simple design and approach.

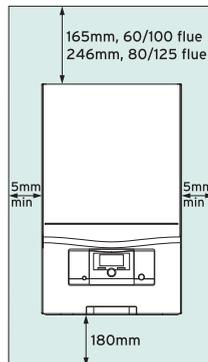

Requiring no hot water cylinder or cold water tank in the loft, this combination boiler provides almost instant hot water delivery to your taps, and fits simply and easily into homes even with limited space.

Offering impressive efficiencies and reduced energy consumption, thanks to its stainless steel heat exchanger, this boiler offers great performance and peace of mind for the future.
