Do you want to keep your computer safe?

18/03/2016 | Shaun Prince (IT Practitioner & Professional ACRBO Member, www.shaunprince.com)

Of course you do, who doesn't. You, like most other PC users, will have been asking yourself the following question at some stage "What Anti-Virus software should I be using?". Well, thanks to a recent test by AV-Test and AV-Comparatives, I can give you the answer you have been looking for…

BitDefender has been recognized as providing its users the best Protection, Speed and Performance, "whilst they enjoy the most advanced cyber-security in the world with unaffected computer performance and connection speeds". Bitdefender won gold in the Real-World Protection Test, an extremely complex test that, in the words of the AV-Comparatives experts, "achieves the most realistic way of determining how well the security product protects the PC."

Following on from this, AV-Test awarded Bitdefender Best Performance for the 2015 and 2016 versions of its Internet Security product. This shows its consistency in doing what it needs to do, secure your PC.
