

Welcome

ELMSLEIGH HOUSE

— DENTAL CLINIC —

Welcome to Elmsleigh House Dental Clinic

Life is better with good teeth, and everyone in the family deserves a healthy, happy smile. So it makes sense to find a dental practice that truly understands your unique needs and can help maintain and restore dental health at every age.

At Elmsleigh House Dental Clinic in Farnham, Surrey, we understand that people's teeth change throughout their lives, and that requirements are so individual and personal. That's why we take time to really get to know you, your lifestyle and what you would like to achieve with your teeth.

Our experienced team of dentists, specialists, surgeons, technicians and hygienists offer an exceptional range of services at Elmsleigh House, so you can be confident in the most personalised, professional result.

Whether you're a new patient yourself or considering registering your family with us, you will gain access to the highest quality of treatment and a unique standard of care.

Above all, we want you to be happy with your teeth and smile.

Technically advanced, professional and friendly

We are here to help you keep your teeth as healthy as possible for life. We are technically advanced and use the most researched materials and proven techniques to deliver treatment to the highest of standards.

All of our dentists are highly qualified, our specialists have completed years of advanced training, and our dental implant team offer expertise in complex techniques. We are trusted by dentists from other practices who refer their patients to us for complex and specialist treatments such as dental implants, and we run courses to share our knowledge with other dentists.

Our friendly dentists will take time to consult, assess, identify and treat comprehensively in an unrushed manner. If you are apprehensive about dental treatment, rest assured our understanding, expertise and range of sedation options will help you access the dental care you need. You will be reassured that advances in modern dental care ensure total safety, comfort and superior results.

We believe you will appreciate the difference.

Your first appointment

You can call to make an appointment from 8.00am to 6.00pm, Monday to Friday on 01252 713797 or email info@elmsleighhouse.co.uk. If you have an urgent dental problem, please call before 10.00am and we will arrange to see you as soon as possible. Outside of clinic hours, our answerphone provides an emergency number for our on-call dentist who will promptly respond (fees apply).

Unless you need urgent treatment, your first appointment will be for us to get to know you and establish where you are now with your dental health and what you want to achieve. We will take photographs of your teeth and smile, as well as X-ray pictures as required. We will perform a thorough assessment of your teeth and gums, and explain our findings so you can make an informed decision if further treatment is required.

If treatment is needed, we will draw up a personalised treatment plan with you, with consideration of your health, cosmetic and financial needs. Your plan is completely bespoke, and will detail all stages and fees. We guarantee these fees will not change throughout treatment, ensuring you will be happy with the result.

Treatment options

General dentistry – *care for all*

Our team of dentists and hygienists excel at providing general dental care to all ages, delivering a reassuring continuity of care to the highest of standards.

We recommend regular visits to your dentist and hygienist to keep your teeth and gums in excellent condition and prevent problems developing. Any issues can be identified early, enabling prompt treatment.

Cosmetic dentistry – *improve your smile*

We offer all aspects of cosmetic dentistry to improve your teeth and smile. Whether you would like whiter teeth, a straighter smile, to get rid of small gaps, smooth rough edges or to change your old silver fillings to natural-looking white ones, we can help. We will start with a consultation to find out what you want to achieve, then use the latest, most advanced treatments to eliminate imperfections and improve your smile.

Dental implants – *replacement teeth that last*

Whether you've lost one, several or all your teeth, we can help to restore your smile with strong, natural-looking dental implants. Essentially 'bionic roots', these small titanium screws

integrate with your jawbone and actively prevent bone loss. They provide a stable anchor for your crown, bridgework or implant-stabilised denture, which will be made to look, fit and function just like your natural teeth.

Our team are leading experts in dental implant placement, using systems that are recognised for their quality and techniques that ensure they will last. We run implant courses for other dentists, and accept referrals for implant treatment.

Orthodontics – *teeth straightening for all ages*

No one needs to tolerate misaligned, crooked or crowded teeth or an uneven smile. Advances in orthodontic treatment mean that children, teenagers and adults can benefit from a range of removable or fixed braces.

Our specialists in orthodontics offer a range of systems, such as Insignia and Incognito fixed appliances and Invisalign removable aligners; treatment times vary, from 9 to 24 months. They will advise you on the best solution for you or your child, with consideration of what you want to achieve and your budget.

Other dentists also refer patients of all ages to us for specialist orthodontic treatment.

Many adults are suitable for faster teeth straightening using anterior alignment orthodontics, such as Cfast, Clear Aligner and Inman Aligner, which move the front four to six teeth into position in as little as 6 months. We offer a free assessment to determine your suitability for faster orthodontic treatment.

Root canal treatment – *rescuing teeth*

Root canal treatment (endodontics) is carried out on teeth where the nerve of the tooth has been damaged by decay or trauma. Our specialists in endodontics use advanced techniques and equipment to preserve teeth that may otherwise need to be removed. Dentists refer their patients to us for root canal treatment because of our specialist care.

Gum disease treatment – *saving your teeth*

Periodontal (gum) disease is an infection of the gums that gradually destroys the support of your natural teeth. Some people are more susceptible than others, and may lose their teeth if the condition is not treated. Our periodontists use the latest equipment and specialist techniques to promote repair and healing of the gums and bone, and to help minimise the progression and recurrence of the disease. Other dentists refer patients to us for specialist periodontal treatment.

Oral surgery – *removing teeth*

We provide comprehensive solutions to dental problems that require oral surgery, including tooth extraction, wisdom teeth impaction, frenectomy, periodontal surgery, bone reconstruction and dental implant placement. Other dentists refer patients to us as they value our oral surgeons' expertise.

Dentures – *a natural-looking alternative*

Our clinical dental technicians make dentures that look like your natural teeth and fit precisely. They will guide you in selecting the best option for you, from a range that includes premier and essential full or partial dentures. We also offer denture stabilisation with dental implants to securely fix your replacement teeth in place.

Sedation – *removing anxiety*

For those who are anxious about dental treatment, we will do all we can to help overcome your nerves. Modern anaesthetic gels rubbed into the gum can make injections less painful. For especially nervous patients or those undergoing lengthier treatments, we offer a range of sedation options that will help you feel relaxed or less aware of treatment.

We reassure, we restore, you smile

Putting you at ease

We will do everything we can to put you at ease from the moment you enter the clinic. In our waiting room you can help yourself to tea or coffee, go on our iPads or browse our range of brochures and magazines. In our comfortable treatment chairs you can listen to music to aid relaxation; we also offer sedation options if you are especially nervous of treatment.

We keep our practice immaculately clean, comfortable and welcoming. We are always open about our policies and prices too, so that everything is transparent and you are never left guessing.

Your safety

We sterilise all instruments between patients using state-of-the-art equipment, and all surfaces are disinfected. Any ready-sterilised surgical items and all cups, gloves and hand towels are disposed of after single use.

We have won an award for our infection prevention and control as it shows our commitment to protecting our patients and team. As part of our policy, we ask that if patients have had a cold sore (caused by the herpes simplex virus) for less than two weeks, to reschedule any non-emergency appointments until after this contagious period has passed.

Our promises, your care

- We offer a comprehensive range of private dental care to all ages at our Farnham clinic.
 - Our experienced team are dedicated to providing the highest quality dental care and treatment to all patients.
 - We take time to explain all treatment options, recommending the best option for you with consideration of your health, cosmetic and financial needs, but leaving the final decision with you.
 - Your chosen option will be written up as a bespoke treatment plan detailing all stages of treatment and fees involved.
 - We guarantee that your quoted fees will not change throughout your treatment, so you know there will be no hidden costs.
 - You will have access to dental emergency advice and treatment.
- We endeavour to be punctual, so please arrive on time for your appointment. If you need to cancel, please give us at least 48 hours' notice, otherwise late cancellation fees may apply. Outside of clinic hours, you can leave an answerphone message.
 - Please be polite and courteous to all members of our staff.
 - We ask that all fees are paid as you leave the clinic, and can provide payment options for more extensive treatments. We accept cheques, cash, Visa and Mastercard.
 - We appreciate feedback, so please inform us if you are happy or not satisfied with any aspect of your visit.
 - Please recommend us to family members, friends or colleagues who would benefit from, and appreciate, the services we offer.

We look forward to welcoming you
