Description/Terms and Conditions

Plus a 1 month trial of our on-line backup system. Our review is designed to help you to make sure IT is working for you, helping you to work more efficiently and effectively. Areas that we will cover include: • Anti-virus - Do you have anti-virus on all your computers? Free anti-virus doesn't work for businesses – let us explain why! • Passwords - Do you know all your passwords, or do you rely on a third party to manage them on your behalf? • Backup - Is your data backed up, and more importantly have ever tried to get something back from a backup? • E-mails - Can you and your colleagues access e-mails when and where you need to (on laptops, iPad, iPhone etc)? • Security - how secure is your network? • Sharing information - Do you have a central place to store your data? Do you have access to the files your staff create (quotes, invoices etc.)? Full Circle exists to help small business owners and managers focus on what they do well – running their business in their field of expertise. We understand that everybody has a different level of IT knowledge and understanding – we always talk at your level, be it tech-speak, or plain English. We pride ourselves on our expert and attentive service. Why not put us to the test – ask us to visit to undertake your FREE IT review TODAY – you will be impressed with how quickly we will respond!
