Description/Terms and Conditions

The Lipotrim complete meal replacement programme offers a healthy way to lose weight when other ways have failed. If you have at least 1 stone to lose, please keep reading. Available since 1987 through GPs and in pharmacies since 2001, the Lipotrim total food replacement programme uses nutrient-complete formula foods, which have proven safe and effective for weight loss. How does it work? You stop eating all conventional foods and replace them with nutritionally complete formula foods. By maximizing the calorie gap, whilst still maintaining nutritional health, the body draws on its reserves of sugar and excess fat to meet the body's energy requirements. This happens regardless of the calories required by each individual. Lipotrim is therefore an excellent diet choice whether you are highly active or sedentary. You are not living on a reduced amount of calories, just changing the source of calories. You will feel comfortable, healthy, and ultimately in control.
