Save £50 on a 304 stainless steel Vortex Ecoflow single cat back system

Offer Expiry Date
08/08/2014

Can only be used at
Vortex
53 Tower Road, Globe Industrial Estate,
Grays
RM17 6ST.

Tel: 01375 372037

Description/Terms and Conditions

Vortex™ ecoflo is a performance exhaust for car owners who want to improve their car's fuel economy and reduce their impact on the environment. A Vortex™ ecoflo exhaust can reduce a car's fuel consumption by up to 10% and drive down emissions by up to 33%! Vortex's patented technology works by using wasted energy (exhaust pressure) to accelerate gas over a profiled shape (science of fluid dynamics) creating a Vortex®. Acceleration of the gas flow creates a low pressure in front of the Vortex®, which results in a vacuum effect. This low pressure allows the engine to evacuate exhaust efficiently in front of the Vortex® and increase the acceleration of gas behind. The effect of scavenging the exhaust gases in front of the Vortex® allows the engine to breathe freely, with little or no gas leakage back into the combustion chamber, allowing cleaner air (oxygen) into the cylinder for a more complete combustion. In addition, the spiralling acceleration of gas out of the system ensures that no further build-up of backpressure occurs. For a limited time only, a 304 stainless steel Vortex Ecoflo cat back system is only £550 plus VAT, including fitting. That's a saving of £50!

This voucher has no cash alternative and is not transferable. It cannot be used in conjunction with any other offer or promotion. Photocopies will not be accepted. Rights are reserved to refuse custom and withdraw this offer at any time.
